There you will see Roebeleni Palms, Ginger Plants, Hong Kong Orchid, Banana and Cuban Laurel Trees. You will see the Aloha Lagoon with its Polynisian style bridges, water falls, water lillies and other sub-tropical foliage. Now you will enter the hanging gardens with air plants, staghorn ferns, Elephantipi, bromeliads and amarylis.

Now on to the Flamingo Lagoon, the children will enjoy the free pony rides. Continue on to the Hibiscus Showcase and see the thousands of hibiscus blooms. You can relax on the shore of Lake "Waltzing Waters", or at the snack bar while enjoying a hot or cold drink with a sandwich or snack. After you have relaxed, continue on towards the 150 foot reflecting pool flanked with native palm trees and papyrus. You will notice the Florintine four seasons statues and the Shrine of the Pieta.

Be sure to see the propoise show before leaving. And do not fail to return in the evening to see the Waltzing Waters show. We urge you to come early and tour the gardens at your leisure during the day. Be sure to pick up your evening pass at the time you sign your complimentary ticket. If you do not return to see this night-time show you will have missed the most spectacular show in the country.

The water equipment used in the Waltzing Waters show is 137 feet long and has 55 underwater lights, five colors, and over 800 nozzles or water jets. Water pinnacles reach 85 feet in height. The piping and pumps are capable of pumping 7,000 gallons of water per minute, or over 210,000 gallons of water during each presentation. The control console contains 115 switches and buttons which are used to produce the dazzling figures of waltzing water and brilliant light effects. This is all done in time to beautiful music. This is a show you must not miss.

Thank you, Mr. Rosen, for your generosity.
